Activities & Leadership

VT Programming Team
Member since Aug 2016

Hackers@VT
Co-Hacker Chair

VTHacks Organizer's Committee
Sponsorship Team & Android + Web Developer

VT Engineering Student Ambassador

Student at CodePath University

Student Council President, High School

Objective: Seeking software internship for the summer of 2018

Education

Virginia Tech – Honors College
BS Computer Science 2019, with a minor in Math
GPA: 3.91

Dean's List with Distinction:
Fall 2015, Spring 2016,
Fall 2016, Spring 2017

Employment

Rackspace - Software Developer Intern   May 2017 – August 2017
- Developed a scalable orchestration engine for running mass automations on over 6000 EC2 instances by installing SSM agents and running audit tasks.
- Additionally, developed an API to post to an endpoint by triggering an Amazon Lambda function when Rackspace customers modify their accounts.
- Became proficient in Amazon Web Services SDK, extensively used Git, and performed regular code reviews. Learned the value of Continuous Integration, and having regular metrics & monitoring through Datadog and Cloudwatch.

Virginia Tech - Resident Advisor   Aug 2016 - Present
- Supervising an area of 35 residents by creating a positive living environment designed to link community, faculty, and residents.

Rakuten - Big Data Intern – Tokyo   Jul 2016 – Aug 2016
- Developed a full stack search tracker using Node.js and Cassandra for Rakuten's search engine to maintain all searches made up to 10 days.

Motion Gallery - Software Development Intern – Tokyo   May 2016 – Jul 2016
- Created a mini-theater service for cafes using basic Ruby on Rails and SQL3 using the Model-View-Controller architecture.

Projects

Anonymously Text Anyone   Jul 2017
- Created an API with a UI to anonymously text anyone in the world by providing just a phone number. The API endpoint triggers an Amazon Lambda function which then sends the text through Amazon's Simple Notification Service.

Yeast-Mutant Database (Undergraduate Research)   Jan 2017– Present
- Researched and created a computational infrastructure to support creation of a CRUD database of genetic mutants in Node.js and MongoDB.

CodeView   Jul 2016 – Sept 2016
- Developed a web service for conducting online real-time programming interviews. Made using Firebase, ACE editor and is completely client-side.

TimeCheck   Jan 2016
- Developed Android app for communication between bus drivers and passengers using Twitter's Fabric API at Hoya Hacks.

Awards & Certifications

AWS Machine Learning Certification, *LinuxAcademy – License 87604*	July 2017
AWS Concepts Certification, *LinuxAcademy – License 85998*	July 2017
AWS Essentials Certification, *LinuxAcademy – License 86719*	July 2017
Bruce H. & Dorothy R. Pauly Scholarship, *VT College of Engineering*	June 2017
Recipient of CSRC Scholarship, *Virginia Tech Computer Science Dept.*	Aug 2016
Recipient of Housing Scholarship, *Virginia Tech*	Aug 2016
Most Interesting use of Twitter API for TimeCheck, *Twitter*	Jan 2016
3rd best hack at Hoya Hacks, *Hoya Hacks*	Jan 2016
